Weapon System

New Generation Multi - Purpose Guided Weapon System

The SPIKE-MR and SPIKE-LR are new generation, man-portable and platform-adaptable advanced multi-purpose weapon systems. The SPIKE system is specially designed for urban warfare, ground support and special missions with maximum survivability.

Both the SPIKE-MR and the SPIKE-LR incorporate advanced features that enable day/night and adverse weather target engagement. The SPIKE-MR is Fire & Forget for autonomous-guided medium range target engagement of up to 2500m.

A fibre- optic data link in the SPIKE-LR enables both the Fire & Forget and the Fire, Observe & Update modes of operation for long range target engagement of up to 4000m.

SPIKE-MR and SPIKE-LR Features

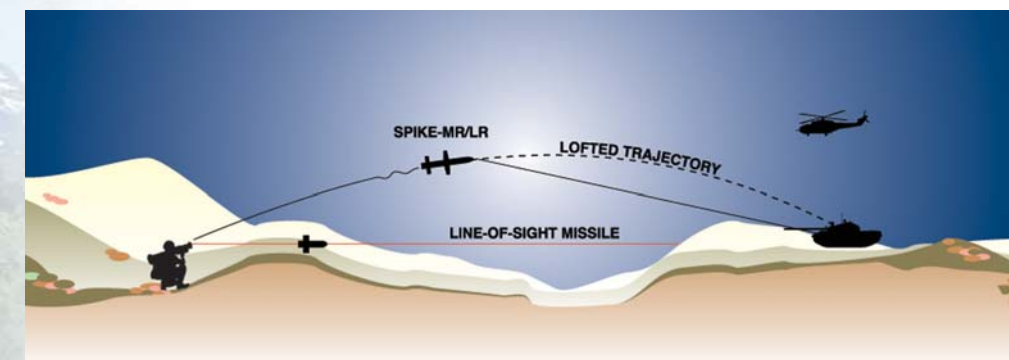

- Autonomous Fire & Forget mode ensures high operator survivability
- CCD & IIR sensors allow day/night and adverse weather engagement of stationary & moving targets
- Multi-purpose warheads, lofted trajectory, high accuracy and high kill probability
- Easy to use: Acquire Target → Lock on → Fire
- Low Life Cycle Cost (LCC) makes the SPIKE affordable to maintain & operate

Advanced Capabilities - Fire & Forget Plus

Fiber-optic data link enables operator to observe & update during flight and provides the unique ability to

- Switch targets after launch
- Attack concealed targets
- Achieve urban warfare precision
- Perform real-time surveillance and damage assessment
- Achieve extended range and pinpoint accuracy
- Minimize collateral damage
- Abort mission after launch
